

# Magnetic Signage

## Preparation and Care

Both the vehicle surface and the brown magnetic side of the sign should be clean and dry. The vehicle should be waxed prior to applying

### **How to apply:**

Let one edge of the sign contact the vehicle in the desired position. Then let the magnet power do the work as it puts the sign into place from the beginning edge to the remainder of the sign. If the sign is not placed exactly where you want it, peel it off, reposition the starting edge and repeat.

Make sure that the entire surface of the sign is smoothly against the vehicle with no air pockets underneath.

In winter the temperature of the sign should be about 50 degrees F. during installation, but the temperature of the vehicle surface does not matter.

Care should be taken with wood grain paneling and metallic finishes. Such surfaces should be checked weekly for the first 90 days of use. A generous waxing of both the surface where the sign will be placed and the back of the sign itself will help prevent damage.

### **Recommended Maintenance:**

Remove the sign weekly and wipe dry both the magnetic side and the surface of the vehicle. During warmer humid weather it is recommended to remove the sign every 3-4 days. This keeps moisture from collecting, which can potentially damage a vehicle's surface. Simply wash it with warm water and a mild detergent. Remove sign after a snowfall and rain and wipe dry.

### **Storage**

Avoid wrinkling by storing in a 3 inch diameter roll with the printed side of the sign on the outside. You can also store it flat.

Do not put heavy objects on top of the sign. Since the sign is permanently magnetic, you need not protect against magnetic destruction.

Corner rounding prevents dog-eared corners. Custom shapes should utilize rounded contours rather than sharp angles for best results

PLEASE NOTE: THERE IS NO WARRANTY EXPRESSED OR IMPLIED AGAINST LOSS OF SIGNS OR DAMAGE TO VEHICLE SURFACES, AS THE FACTORY HAS NO CONTROL OVER HOW SIGNS ARE CARED FOR, ALTERED, STORED, AND/OR USED OR THE SURFACE TO WHICH THE SIGNS ARE APPLIED.
